3D view In 2016, Autodesk announced 3D view for the Microsoft Surface Studio 2, a combination of a 2D drawing and 3D view for 2D drafting and design. In addition, AutoCAD is offered as a free download on the Android, iOS and Windows Phone platform. The release of AutoCAD Architecture 2016 with Feature Pack 2 for the new 3D view, added improved 3D view capabilities. Community based content Application development with the AutoCAD Application Development Kit (ADK) AutoCAD has an Application Programming Interface (API) that has been available since AutoCAD 1998. Today there are a number of third-party applications that connect directly to the API and can use all of the features of AutoCAD, including 2D drafting, 3D modeling, and a combination of both 2D and 3D. The ADK allows programmers to extend AutoCAD with their own features and data sources, and is available for Microsoft Windows, Mac OS X and Linux. AutoCAD has a rich API which supports both a "low level" and "high level" programming interface. The high-level programming interfaces provide classes for common tasks such as drawing commands and data management. A "low-level" programming interface provides tools that are optimized for user customization. In most cases the user is required to use the lower level programming interface. Over the years, a number of plug-ins have been made available by AutoDesk and third-party developers to add features to AutoCAD. These include: AutoCAD Drawing Add-Ons AutoCAD LISP add-ons (WIL, LiSP) AutoCAD VBA and AutoCAD.NET add-ons Autodesk also provides a

forum to discuss, review and develop add-ons. In 2004, Autodesk also launched its own add-on system, Autodesk Exchange Apps. In 2012, Autodesk Exchange Apps was renamed to Autodesk Exchange Apps on the cloud. Licensing AutoCAD charges licensing fees to users, and has a single product license which covers all installed versions of the software. International versions Subscription Autodesk Ultimate Subscription and Authorized Training AutoCAD LT is a freeware version of AutoCAD, which does not include any third-party add-ons or software development tools.
