Mar 16, 2018 I'm not having the same issue, its working fine for me, and that is the main problem, not to be "grounded" on an out-of-date old version. Jun 2, 2019 I'm trying to use the elicenser toolbox to register an activation code to activate cubase, and it says that cubase has not been activated. The activation code i have is only for albrecht monitor, so i'm trying to get it working for cubase. May 19, 2020 You need to attach a USB "licensing key" for Cubase installed on your computer. If your license key was issued before the Cubase version 11 was released, you will need to activate your license on your computer (make a backup copy of your music before doing this). Attach the USB "licensing key" to your computer, open Steinberg Licensing Control, click on "Activate License Key", and a pop-up window will be displayed on your screen. You must activate your license for Cubase (not the license issued for Albrecht Music Monitor). If your license key was issued after the Cubase version 11 release, your license key will be activated automatically by Steinberg Licensing control
