## HD Online Player (Maleficent 720p Dual Audio Kicka) |VERIFIED|

once you begin to interact with online players, you start off by building a relationship. your personality and ability to be humorous with your plays will influence which players are willing to help you out and which you are just happy for the company. there are plenty of people out there that would actively seek to murder you, so be careful. at any rate, you'll be utilizing your relationship with other players to send them sos messages, and if they accept, you'll be able to summon them and use their abilities to heal your party. the cast of persona 4 is narrow, and you have only one person to help, so there are a limited number of skills in the game. so summoning up other players and helping them out is pretty much the only way for you to get help with the plot. moreover, calling up another player will often jolt the main protagonist in a supernatural manner, making the game feel more thematic and sense. more like you are playing a role-playing game with the powers of a simulation game. aside from completing the game and obtaining the three arcs or endings, the only other way to get the option of summoning another player is to play the tv world every single day of your life with your friends. in fact, playing this way is an integral part of the social link mechanic, in which you assign each person in your party to two other people to bond with. you can then enjoy a party together when you want, but it won't be around online chat or voice communication. this is akin to that multiplayer component i mentioned earlier. it allows you to play social features with like-minded individuals for a period of time, but then you have to repeat the process tomorrow with a new group of friends.

## HD Online Player (Maleficent 720p Dual Audio Kicka)

since golden is always running in the background, you'll often be able to warp into your friends games by the time they're ready to move on. if you have a heightened level of online awareness, then you'll be one of the first to notice when they've got a new character due to the tendency to leave a little trail of influence as they move through life. there's more than just being able to see other players. you also have the ability to influence them. starting a new game will usually place you in the role of a new student. you can select your character, then head to the bathroom to claim your locker (or wistfully admire them from afar) before going on your way. sometimes it's best to leave others to their own devices. other times, you can influence them in unexpected ways. having a basic knowledge of your character is important when things get complicated and requiring a lot of sacrifice. if a solution is blocked off and you have no progress, other players can step in and help you out. aside from being a great way to get your role playing experience through some passive social interaction, we always find out what happens when we leave the character to himself. on multiple occasions, we've even encountered a strong match that we had to leave to others. you can always return and make sure the party doesn't end in a stalemate, but leaving is never a great idea. there are a lot of nooks and crannies to investigate and interact with in the game, so you could easily get lost in its vast world without a sound plan. just like fallout 3, if you leave your companion to their own devices, you might find something really out of the ordinary. generally, we've seen them just wandering around, but some of them are more inquisitive than others. when we came back, we discovered they
